Parkinson's
Victoria

1981 – 2011

30
PROUD
YEARS
OF SERVICE

Parkinson's Victoria is a not-for-profit, specialist organisation that has been supporting and assisting Victorians since 1981.

Our team of health professionals provide a wide range of support services to assist individuals in managing Parkinson's symptoms, to improve quality of life and reduce the impact of Parkinson's on individuals, families and the wider community.

Parkinson's is a progressive, neurological condition that affects the brain's ability to control physical movement, such as walking, talking and writing.

It is not fatal however there is currently no cure. Symptoms can severely impact on the individual's quality of life and independence.

**Join Parkinson's Victoria
for an update on some of the latest
*Parkinson's research
developments
and future directions*
followed by afternoon tea**
